WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER
KAYAK
Sep 2020 - Nov 2024

- Veteran developer on the Hotels team, leading feature development, organizing tasks, and monitoring experiment progress
- Led the project designing the new API for Hotel details pages, porting architecture to React
- Interviewing & mentoring junior developers
- Collaborating with product & design team to develop creative and user friendly solutions
- Running, monitoring & evaluating A/B tests
- Maintaining website health through monitoring dashboards & alerts as well as unit & E2E tests
- Helping Hotels team balance new feature work with technical debt

SOFTWARE ENGINEER
KAYAK
Sep 2015 - Sep 2020

- Extensive work developing and experimenting with new filters for our results pages
- Spearheaded cross team features, including integrating review keywords as smart tags for filtering hotels
- Developed and took ownership over features, tracking analytics and monitoring for errors
- Brainstormed improvements and took initiative during Hack Weeks to implement and run experiments for new user features
